EDUCATION

Ramrao Adik Institute of Technology (RAIT), DY Patil University <i>B.Tech in Computer Science & Business Systems (CSBS) CGPA: 8.74 / 10</i>	Navi Mumbai, India 2023 – Present
Tilak Public School, Navi Mumbai (CBSE) <i>12th Grade 67.6%</i>	Navi Mumbai, India 2022 – 2023
Our Own High School, Dubai (CBSE) <i>10th Grade 74.6%</i>	Dubai, UAE 2020 – 2021

EXPERIENCE

Data Analytics & Machine Learning Virtual Intern <i>Forage (Remote) — Tata-GenAI Deloitte Commonwealth Bank</i>	July 2025
- Performed data cleaning, EDA, feature engineering, and model building using Python and Excel. - Built interactive dashboards and visual reports using Power BI and Tableau. - Applied Generative AI tools to synthesize datasets and present structured business insights.	

PROJECTS

AI-Based Pest Prediction & Management System <i>Flutter, FastAPI, XGBoost, Python</i> Team of 4	
EYIC 2025 Semi-Finalist (IIT Bombay); trained XGBoost on ICAR weather/pest data (10 features) achieving 71% accuracy (F1: 0.76) for rice and 73% (F1: 0.79) for cotton. - Developed cross-platform Flutter app with FastAPI backend delivering IPM-aligned, cost-optimised advisories with resistance-aware Mode of Action logic.	
Smart Traffic Analytics Platform <i>YOLOv8, FastAPI, Docker, Supabase, Streamlit</i>	
- Re-architected a monolithic app into 4 independent microservices (Ingestion, Detection, Analytics, Dashboard) — real-time vehicle detection, multi-class tracking, and speed estimation using YOLOv8. - Containerized with Docker, deployed on Render.com via GitHub CI/CD, results persisted to Supabase PostgreSQL — entire platform on free tier.	
Fraud Detection System <i>Python, scikit-learn, pandas, Streamlit</i>	
- Built fraud classifier on PaySim dataset (6.3M transactions, 0.13% fraud rate); engineered balance-difference features and applied <code>class_weight='balanced'</code> to handle severe class imbalance. - Achieved 95% recall on fraud class; deployed end-to-end sklearn Pipeline (StandardScaler + OneHotEncoder + Logistic Regression) as a Streamlit web app.	
Context-Aware Phishing Detection <i>Python, NLP, LightGBM, Streamlit</i> Team of 3	
- Trained LightGBM on 4 real-world datasets (Enron, SpamAssassin, CEAS-08) achieving 99% accuracy, F1: 0.99, ROC-AUC: 0.9996 on 18,886 test samples; sender trust scoring raised AUC from 0.9989 to 0.9996. - Built TF-IDF + structural feature pipeline with SHAP explainability; validated on 2,000-sample external dataset; deployed as a Streamlit web app.	

TECHNICAL SKILLS

Languages: Python, SQL, C, C++, Java (Basics), Git
ML & Data: scikit-learn, LightGBM, XGBoost, pandas, NumPy, Matplotlib, Seaborn, TensorFlow, OpenCV
Cloud & DevOps: Docker, FastAPI, Streamlit, Render.com, Supabase, REST APIs
Visualization: Power BI, Tableau, Excel

CERTIFICATIONS

Oracle Analytics Cloud 2025 Certified Professional — Oracle	Sep 2025
AWS Academy Graduate — Cloud Foundations — Amazon Web Services	Mar 2026
Google Gemini Certification — Google for Education	Nov 2025
Google Analytics Certification — Google	Mar 2026
