SOFTWARE ENGINEER - *leveraging +9 years of experience*

Result-driven Software Engineer with over 9+ years of experience facilitating cutting-edge engineering solutions including developing a wide range of e-commerce application utilizing various technology skills. Proven ability to leverage full-stack expertise to build interactive and user-centred website designs to scale. Extensive expertise in infrastructure architecture development and administration, as well as network design and configuration.

Extensive knowledge on software testing, automation, designing, developing and implementing test plans, test cases and test processes. Capability to explore, learn and understand newer business domains and new technology.

PROFILE SUMMARY

- Proficient in working closely with clients and cross-functional departments to communicate project statuses and proposals.
- Highly efficient in developing and directing software system validation and testing methods.
- Expert in analysing data to effectively coordinate the installation of new systems or the modification of existing systems.
- Skilled at determining operational feasibility by evaluating analysis, problem definition, requirements, solution development, and proposed solutions.
- Competent in developing software solutions by studying information needs, conferring with users, and studying systems flow, data usage, and work processes.
- Gained expertise in documenting and demonstrating solutions by creating documentation, flowcharts, layouts, diagrams, charts, code comments and clear code.
- Highly efficient in repairing and installing solutions by determining and designing system specifications, standards, and programming.
- Adept at improving operations by conducting systems analysis and recommending changes in policies and procedures.

CORE COMPETENCIES

- | | | |
|-------------------|------------------------|-----------------------------------|
| ▪ App Development | ▪ Database Programming | ▪ Object-Oriented Programming |
| ▪ Cybersecurity | ▪ Machine Learning | ▪ Agile Development Methodologies |
| ▪ Data Science | ▪ Debugging | ▪ Coding |

PROFESSIONAL EXPERIENCE

PCS, Pune

Jan. 2018 – Sept. 2021

Software Engineer

- Developed Java code for backend business logic, interfacing with oracle database using JDBC and SQL, parsing and processing XML documents.
- Skillful at interfacing with team lead and business analysts to refine project requirements, raise awareness of issues, and suggest possible solutions.
- Participated in the development, enhancement, and maintenance of several commercial software applications.
- Demonstrated strength in learning new technologies and applying them to required solutions.
- Assisted with the integration of hibernate to facilitate retrieval and storage of data.
- Participated in product upgrades to utilize spring framework to handle java bean creation and configuration.
- Integrated user interface enhancements like JQuery, Ajax, and Json to improve functionality and successfully handled numerous minor application enhancements, upgrades and bug fixes.
- Utilized other relevant technologies: Mongodb, ANT, Eclipse, Subversion, JIRA, BIRT (business intelligence and reporting tools), Tomcat, Maven, GIT, Struts, Junit, Bootstrap, AngularJS, JQuery mobile, and IntelliJ IDE.

NatWest Group, Pune

Apr. 2015 – Dec 2017

Software Engineer

- Analyzed, designed, developed, and implemented SAP BW/IP/HANA requirements working on moderately complex to highly complex efforts with integration dependencies on SAP ECC, Snowflake and Custom REI applications
- Worked collaboratively with product manager and engineering team that included other engineers, architects, principal business analysts.
- Collaborated with business partners from Merchandising, Retail and finance teams for reporting requirements, Incident resolution and UAT support.
- Identified and provided recommendations for performance optimization of BW ETL and AO Reporting.
- Supported ABAP/SQL code reviews within and across teams.
